As a leader of a QM team responsible for overall project quality management in project with 100+ team members spread over 5 locations. Currently working on design and implementation (java, hibernate, hsqldb, digester) of SW quality statistics evaluation system which will help in monitoring quality status of project.

Key words: Java, Swing, XML, XML-RPC, Hibernate, Digester, JCE, Python, Quality Management, Software Quality Metrics

**Software Developer (Freelencer)** www.bigballgolfgames.com March 2006 – July 2006

Key words: ASP, MS SQL Server, T-SQL, HTML, CSS, JavaScript

Responsible for redesign and implementation of fantasy golf games site.

**Software Developer**

Heiler Software, Wroclaw Poland

April 2001 – October 2003

Working in a multinational team developing B2B solutions for e-procurement and high-volume electronic catalogs management uses J2EE technologies. Participating in technological research, coordination of project realization. Technical support for QA (issues identification, features clarification). Porting COM+ based solution into J2EE. Porting MSSQL database into Oracle. Design and implementation of core system components.

Key words: EJB, Servlets, JSP, TagLibs, Struts, PL/SQL, T-SQL, Migration from MS SQL to Oracle, JBoss, Tomcat, HPAS, JRun, Oracle, IDEA, CVS, PL/SQL Developer, MS SQL Server, XML, XSLT, SOAP (AXIS 1.1), Ant

**Software Developer**

AmericanEagle, Chicago USA

November 2000 – February 2001

Remote work for a privately owned internet company.

- Designed and implemented several parts of admin section for one of the biggest online newspapers in USA [www.worldnetdaily.com](http://www.worldnetdaily.com)
- Designed and implemented several B2C web sites

Key words project: ASP, VBScript, JavaScript, Internet Information Server, Microsoft Index Server

**Developer**

Systembureau Software, Wroclaw Poland

July 99 – October 2000

Developer for Internet mortgage application system designed for Deutsche Pfandbrief Bank Group.

- Wrote many different parts of the system in Java with ORACLE DBMS for data storage.
- Redesigned, reimplemented middle tier and changed technology from ASP to the JAVA Servlets.
- Responsible for maintenance of the whole system on the Bank's machine.

In the process of designing and implementing the mortgage application system based on J2EE technology.

Developer for content management system called Amsterdam.

- Wrote many different parts of this huge, based on 1700 classes, project such as:
  - an interface to the SAP R/3 system (JRFC)
  - application GUI (Swing)
  - HTML/XML front-end (Servlets, JSP)
  - transparent access to different data sources (JDBC)
- Was in charge of testing different RDBMS and JDBC drivers for them.

Key words project: Servlet, JSP, Java Beans, JDBC, JRFC, Swing

**Team Leader / Programmer**

Techland Inc., Wroclaw Poland

September 96 - June 98

Supervised five-person team that included both programmers & graphic artists. Designed and implemented of fundamental parts using Visual C++.

Key words project: C/C++, OpenGL, DirectX

**Education**

**Wroclaw Institute of Technology**

Wroclaw, Poland

1994 - 2000

Masters Degree of Science in Computer Engineering.  
Academic scholarship.

**Intensive ESL**

Oakton Community College, Chicago

November 98 - May 99

Intensive English language class for advanced students.

**Foreign Languages**

Speak fluent Polish and English and basic German.
